## ABOUT **GTHAUS**

---

### **THE INDUSTRY LEADER BASED ON INNOVATION.**

GTHAUS is a global leader in producing super premium exhaust system products for the high-performance car market. Founded in the year 2000, GTHAUS has a vertical business integration from manufacturing to sales. GTHAUS products are manufactured between 5 factories across 3 countries.

---

### **DISTINCT SOUND, SOLID PERFORMANCE, AND PREMIUM BUILD QUALITY.**

We have been innovating and leading the industry for over 20 years, delivering world-class products that are unmatched in quality, design, and performance. From titanium to carbon fiber, from valve-controlled to intricate straight-pipe systems with a mirror finish, GTHAUS continues to introduce new innovations to the ever-expanding auto industry, generating a cult following of car enthusiasts around the world.

## GLOBAL DISTRIBUTION REACH AND MARKET LOGISTICS

1500+ Network of Domestic and Global Authorized Dealers and Distributors

*Coverage includes:*

- OEM Dealerships including Mercedes-Benz, BMW, Porsche, Chrysler, Jeep, Dodge, RAM
- Reputable Performance Shops and Tuners
  - Representation in every major US city including Canada and Mexico
  - Major Countries in Asia, Australia, Europe, Middle East, South America and Africa

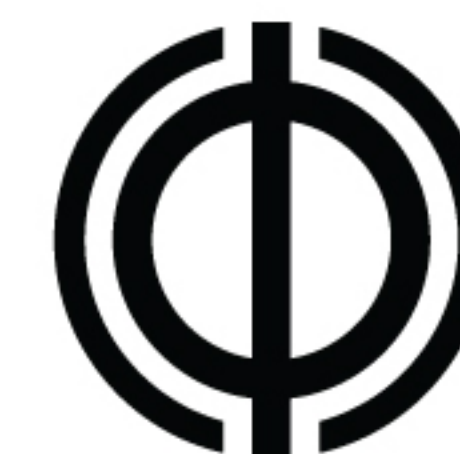

### **SPONSORSHIP PROGRAM**

- E-Commerce, social media, forums, and regional car clubs
- Strategic partnerships with influential Brand Ambassadors around the world through seeding and sponsorship programs

# GTHAUS

Headquartered in Chicago, IL, GTHAUS is the home of Meisterschaft, MUSA, and American Roar Racing products, which are renowned for their quality, performance, and style. GTHAUS is more than just an exhaust company; it is a lifestyle choice for those who appreciate the best.

# **Meisterschaft** (EURO/EXOTIC) PINNACLE OF ENGINEERING

GTHAUS set out with one simple idea:

***To create one exhaust product superior to all others  
– the masterpiece of exhaust systems – Meisterschaft is the result.***

Meisterschaft is more than just an exhaust system - it's a masterpiece of engineering and design. GTHAUS has over 2 decades of experience in creating super premium products for European and exotic vehicles. We work with world-class partners who share our vision of excellence, innovation, and quality.

**Meisterschaft exhaust products are simply the best in the market – no compromises, no regrets, no competition!**

# GTHAUS

## ADVANTAGES

1. **STYLE**
2. **SOUND**
3. **PERFORMANCE**
4. **BUILD QUALITY**
5. **WORK OF ART**
6. **FINE FREQUENCY TUNING**
7. **PROVEN PERFORMANCE**
8. **ADVANCE VALVE TECHNOLOGY**

Distinct Sound, Solid Performance, and Premium Build Quality are the hallmarks of GTHAUS exhaust systems. Whether you're in the market for a sporty, aggressive, or exotic sound, our exhaust systems are custom tailored to suit your individual preference. You can choose from different materials, performance levels, pipe sizes, and tip options including size, shape, and finish.

# 1 GTHAUS UNIQUE STYLE

---

Meisterschaft Premium exhaust systems utilize traditional and modern styling to create the worlds most advanced and unique exhaust systems.

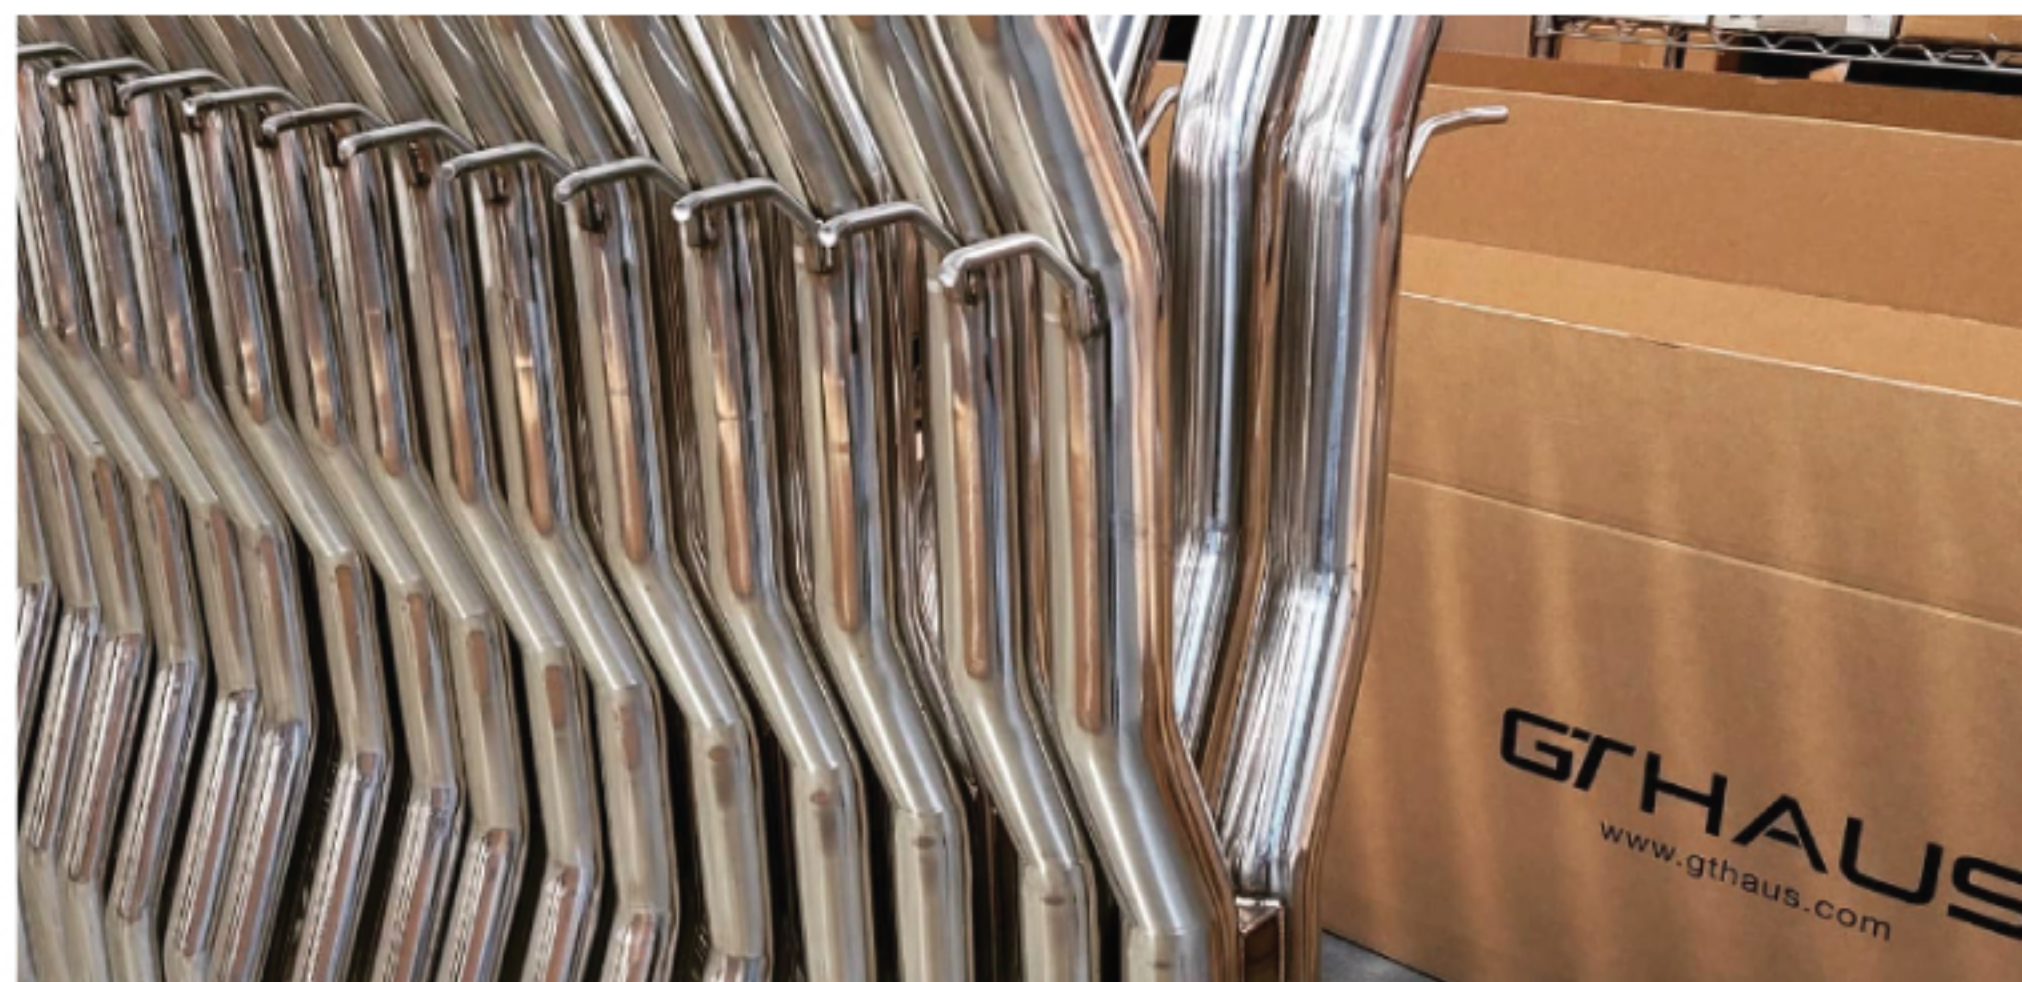

From the brilliantly engineered internal design which maximizes performance, to the highly polished exterior finish and marvelous hand welds, Meisterschaft exhaust systems look as beautiful as they sound.

***Every unit is pre-tested and quality control checked after every step of the manufacturing process. All final inspections are performed by chief engineers at our factory to guarantee the perfection in functionality and appearance.***

GTHAUS Premium exhaust systems are the perfect blend of classic and modern design, giving your car a unique and stylish look. You will also experience a boost of performance with our smart internal design that optimizes airflow and reduces back pressure.

GTHAUS exhaust systems sound incredible, with a deep and throaty roar that will turn heads wherever you go. They are also made with the highest quality materials and craftsmanship, with shiny polished surfaces and exquisite hand welds. Every unit is tested and checked by our expert engineers to ensure flawless functionality and appearance.

## 2 **GTHAUS** **AWESOME SOUND**

You won't find a better sound than our GTHAUS exhaust products. Meisterschaft, Musa, and American Roar Racing are the ultimate choices for your car.

We use cutting-edge technology to design our "smart canister" variable chamber, which gives you a powerful roar on the outside and a joyful ride on the inside.

We spend countless hours of R&D to fine-tune each exhaust system to perfection. Our products deliver a refined, exotic, unique, and awesomely aggressive sound that will make you stand out from the crowd.

Using state of the art fluid flow meter testing, natural frequency sound testing and finite element manufacturing techniques, we were able to create a "smart canister" variable chamber design from which ***we achieve an aggressive exhaust note on the outside of the vehicle, yet minimally or virtually non-existent in-cabin resonance.***

Countless hours of R&D are undergone to achieve pitch perfection from each vehicle. ***The result is an exhaust system that is as perfectly tuned as a fine musical instrument, delivering a refined, exotic, unique, and awesomely aggressive sound.***

\* Please note: Performance can be maximized if Meisterschaft rear muffler sections are used in conjunction with optional mid-pipe section(s) and/or catalytic replacement section(s).

## 3 GTHAUS AMAZING PERFORMANCE

You won't believe how awesome GTHAUS exhaust products are GTHAUS systems fit your car perfectly, no generic or universal parts here. They give you a huge power boost. We use the optimal design, methods, and pipe size for each product. They verify them on a Mustang Dynamometer to ensure they rule.

Our improved systems make your car lighter and faster! Meisterschaft stainless steel exhausts are up to 50% lighter than OEM ones. Titanium ones are up to 80% lighter. Amazing.

**No cutting corners** - all GTHAUS exhaust products (Meisterschaft, Musa, and American Roar Racing) are engineered to provide the absolute maximum power gain at the wheels and are custom tailored to each specific model - without the use of any universal parts.

**Solid power gains** are the most focused-on element when it comes to product development, which are realized by the most efficient and advanced thermodynamic product design process, by state of the art, finite element manufacturing techniques, and also by selecting the optimal pipe diameter for each product design. At the end of each product development, the system is installed onto the vehicle then test ed furthermore using a state of the art all-wheel-drive Mustang Dynamometer (at our U.S. R&D facility) to make sure all performance expectations have been met.

**Weight reduction** - our exhaust systems are "significantly" lighter than the Original Equipment Manufacturer (OEM) unit's overall carrying weight. Meisterschaft stainless steel (SUS) exhaust systems typically weight 30% - 50% less than the OEM units. Titanium (Ti) versions offer a weight reduction of 50% - 80% when compared to the OEM unit.

# 4 **GTHAUS** THE BEST BUILD QUALITY

GTHAUS exhaust systems are amazing! They are 100% hand-built by skilled fabricators who use only the finest materials. We use T-304 grade stainless steel from POSCO for our stainless steel (SUS) systems, and titanium alloy from Shin Nippon Steel for our titanium (Ti) alloy systems. These materials are strong, durable and resistant to corrosion and heat.

You can trust GTHAUS exhaust systems to last for a long time and perform well in any condition. Whether you drive on the street or on the track, GTHAUS exhaust systems will give you the best sound and performance possible.

Meisterschaft, Musa, and American Roar Racing exhaust systems are 100% hand-built. Each exhaust system is carefully TIG-welded by our artisan fabricators using only the best available materials.

Our stainless steel (SUS) systems are produced using POSCO sourced T-304 grade stainless steel, and titanium alloy from Shin Nippon Steel for our Titanium (Ti) alloy exhaust systems.

Using the highest grade materials enhances the durability and lifespan of our exhaust systems. GTHAUS exhaust systems do not suffer from corrosion when exposed to the elements, so there's no need to worry about rust developing over time.

Using the best materials allows GTHAUS exhaust systems to endure the extreme temperatures and conditions it faces on a daily basis and at the race track which aids to the longevity of the exhaust systems.

# 5 GTHAUS

## STUNNING WORK OF ART

At GTHAUS, we are passionate about our exhaust systems. We use only the finest materials that guarantee durability and performance. We carefully craft each exhaust system by hand, with precise bends and flawless TIG welds. We don't compromise on quality - every exhaust system we deliver is a work of art. When you choose GTHAUS, you get a stunning and reliable exhaust system that will wow everyone.

### PREMIUM MATERIAL CHOICES

#### T-304 POLISHED STAINLESS STEEL & TITANIUM ALLOY

Every component of a Meisterschaft, Musa, or American Roar Racing exhaust system is crafted from 100% high quality T-304 stainless steel or 100% premium titanium alloy.

While some other leading brands in the industry will use lesser grade materials on certain components (ie. flanges, hardware, etc.) to save on cost, Meisterschaft, Musa and American Roar Racing uses POSCO top quality T304 grade stainless steel or Shin Nippon Steel 100% premium titanium alloy through and through.

### WORK OF ART BY ENGINEERS

#### SUPERIOR HAND CRAFTSMANSHIP AND ATTENTION TO DETAIL

With carefully chosen top quality material, from start to finish, each exhaust system is meticulously hand crafted from every bend down to each individual TIG weld.

Out of the box, each and every exhaust system is a real show-quality piece; a true work of art. Often times, we see other manufacturers polish up one unit to be showcased in advertisements and at trade shows - not us. What you see is what you get when you order an exhaust from GTHAUS.

A finely crafted work of art, a show-quality piece every time.

*\* T-304 Stainless Steel*

*\* 100% Premium Titanium Alloy*

# 6 GT HAUS

## FINE FREQUENCY TUNING

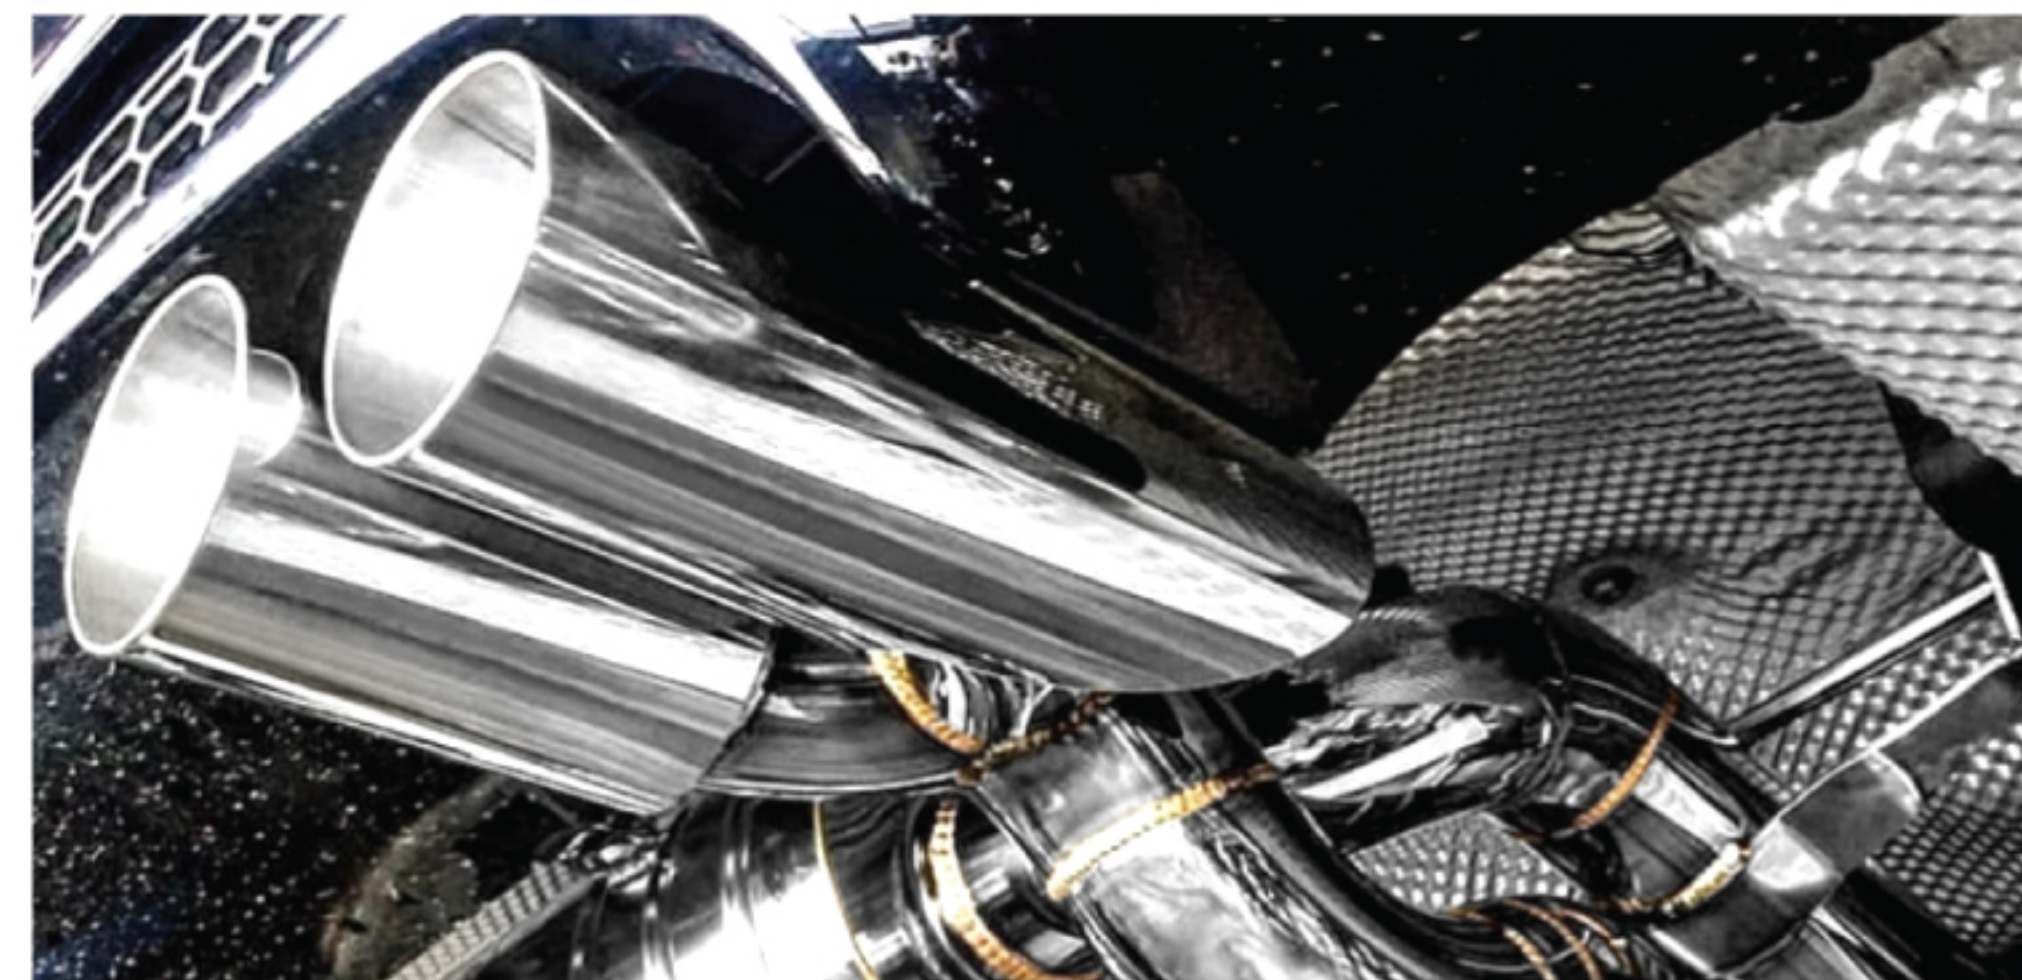

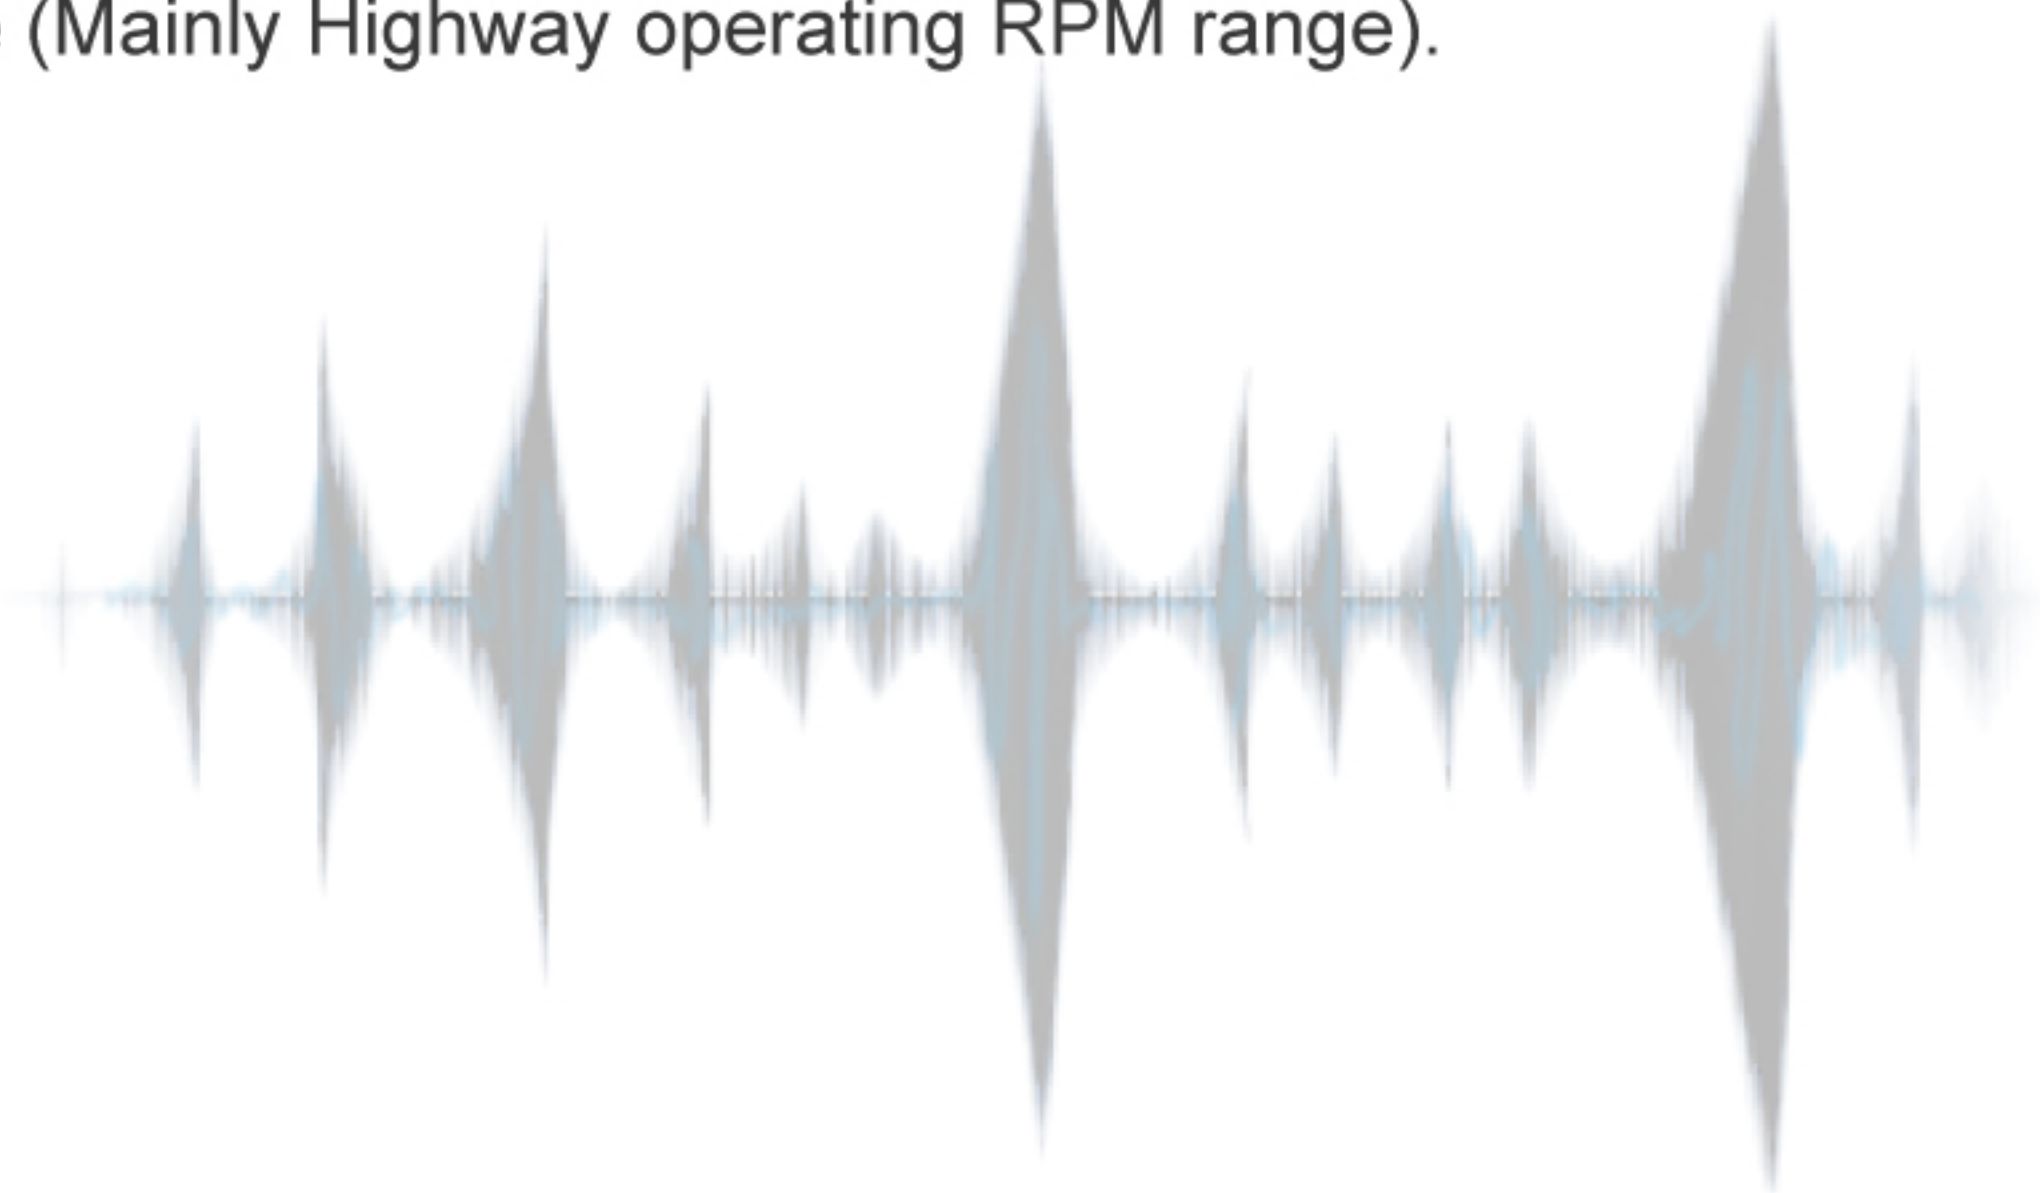

Our exhaust systems are like musical instruments: we handcraft each one to fit a specific car and to bring out its unique character.

We eliminate any drone, the annoying noise inside the car, by solving any design or structure problems that might create unwanted frequencies at highway speeds.

You enjoy the best of both worlds: a powerful, exotic sound outside and a gentle tone inside the car.

A unique musical instrument custom tailored for each vehicle, finely tuning each system to achieve a sound that perfectly matches the characteristics of that particular vehicle.

To avoid any unpleasant in-cabin noise, called drone, during our product developing stage, we eliminate any possible design / structure flaws that might be causing intrusive noise frequencies within our product operating range (Mainly Highway operating RPM range).

# 7 GTHAUS

## SOLID PROVEN PERFORMANCE

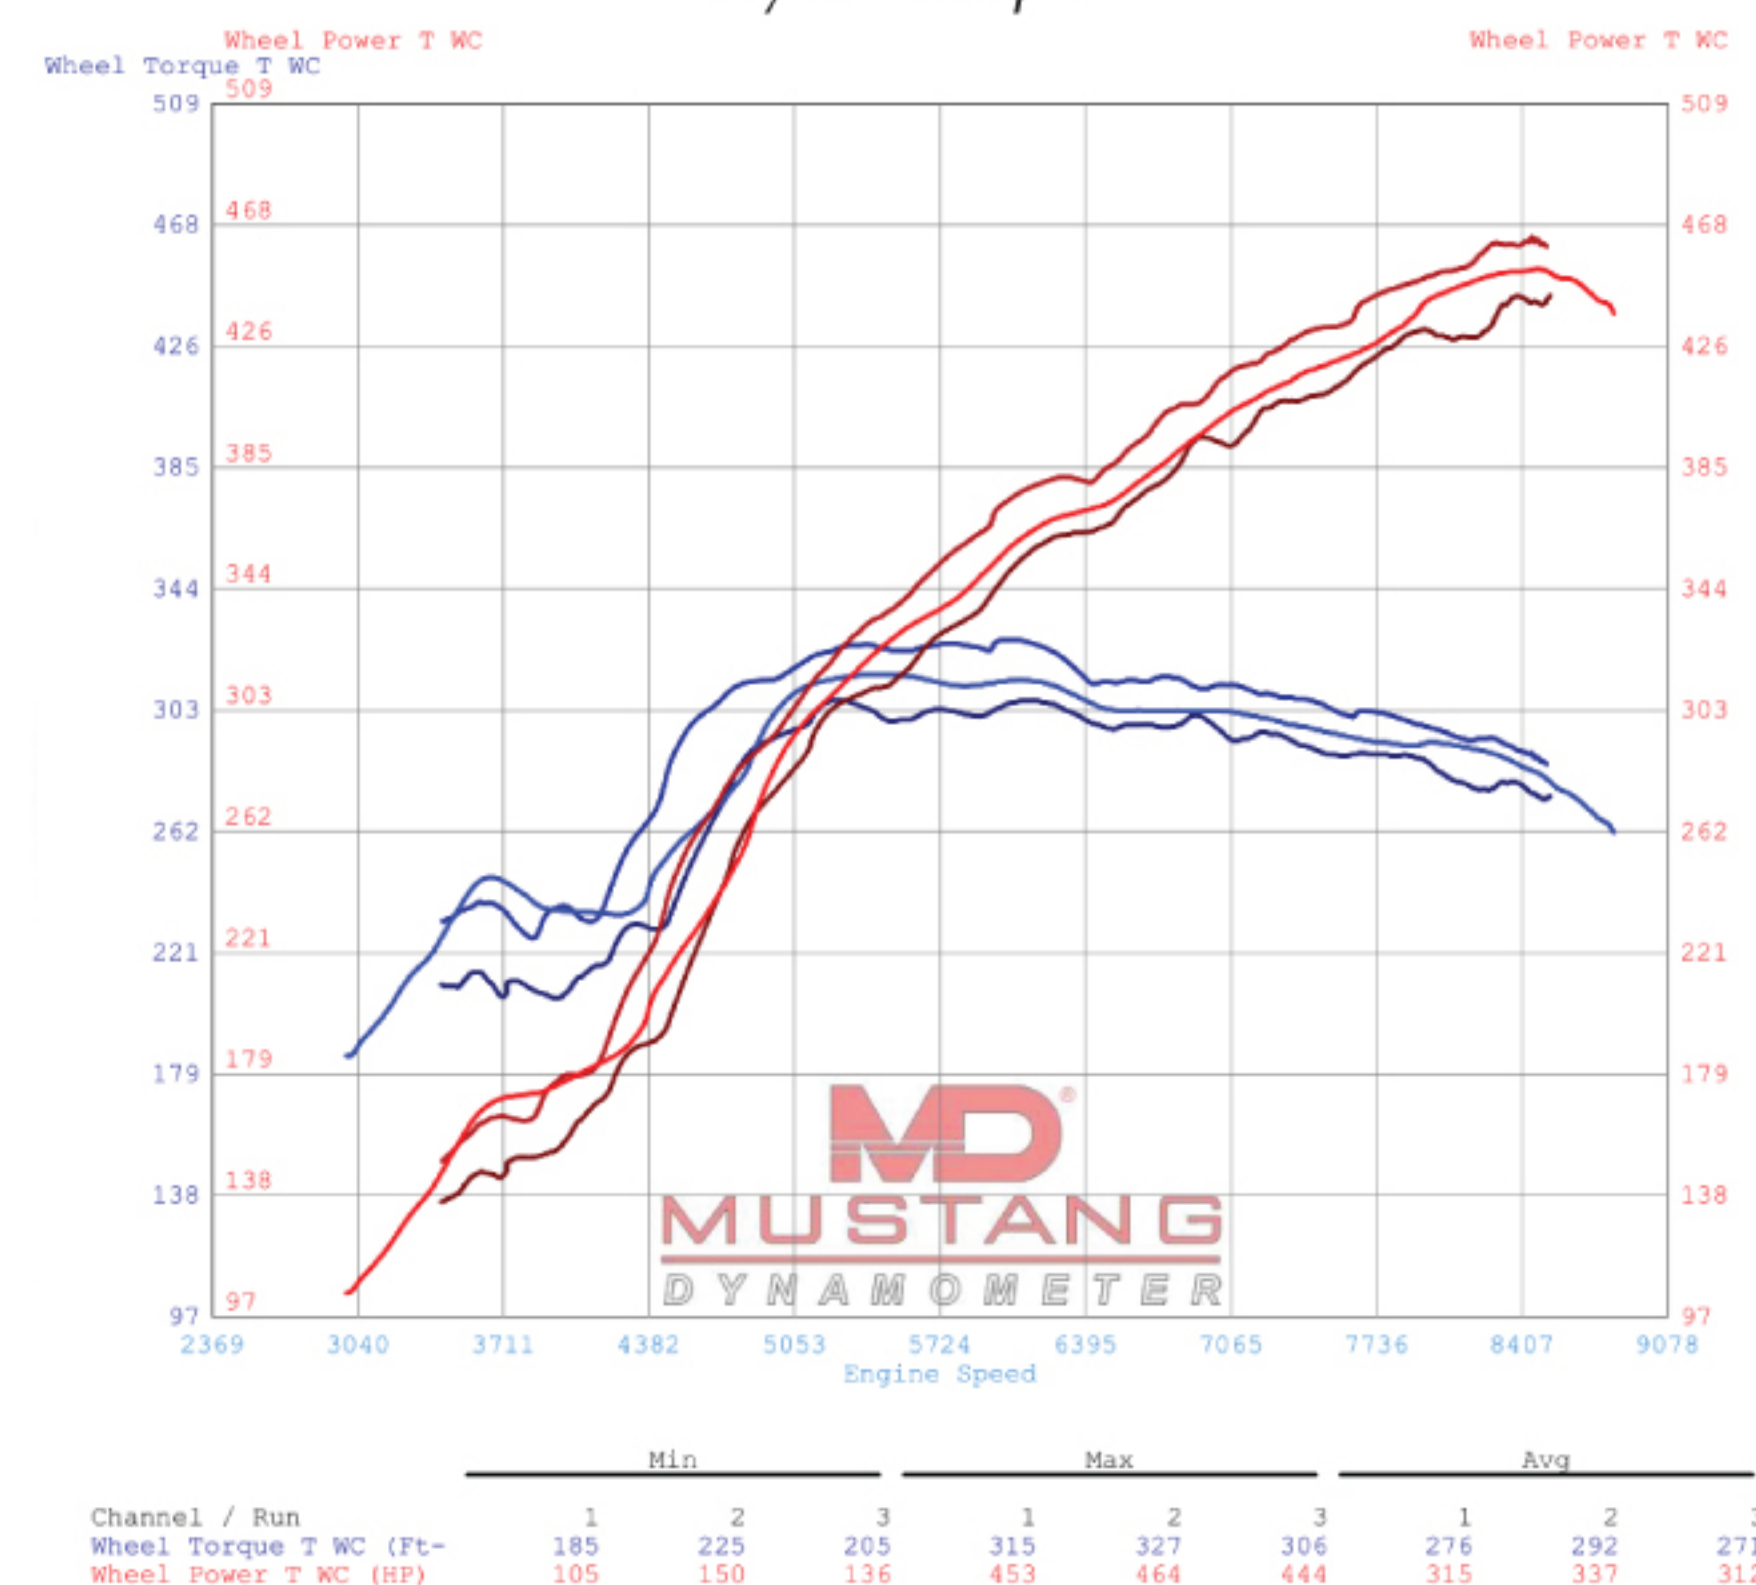

If you want the best performance for your car, you need GTHAUS exhaust products. Whether you choose Meisterschaft, Musa, or American Roar Racing, you can be sure that you are getting a product that is designed specifically for your model, with no generic universal parts. Our exhaust systems deliver maximum power gains at the wheels, thanks to our advanced engineering and testing process.

We use the latest technology and methods to optimize the pipe diameter and thermodynamics of each product. We also test each system on a state of the art all-wheel-drive Mustang Dynamometer at our U.S. R&D facility to ensure that they meet our high standards. Our exhaust systems are also much lighter than the OEM ones. Our stainless steel systems are 30% - 50% lighter, and our titanium systems are 50% - 80% lighter. That means less weight and more speed for your car.

During R&D, each developing exhaust system are thoroughly flow tested and designed to yield the maximum results in performance. After prototyping process is completed, each exhaust system is installed and tested on a chassis dynamometer. Dyno-proven before the prototype design is finalized to ensure ample performance gains in both horsepower (HP) and torque (TQ). We do not release any of our prototype models to production until we, ourselves, are fully convinced and satisfied with the performance results.

\* Dyno-Graph

# 8 GTHAUS

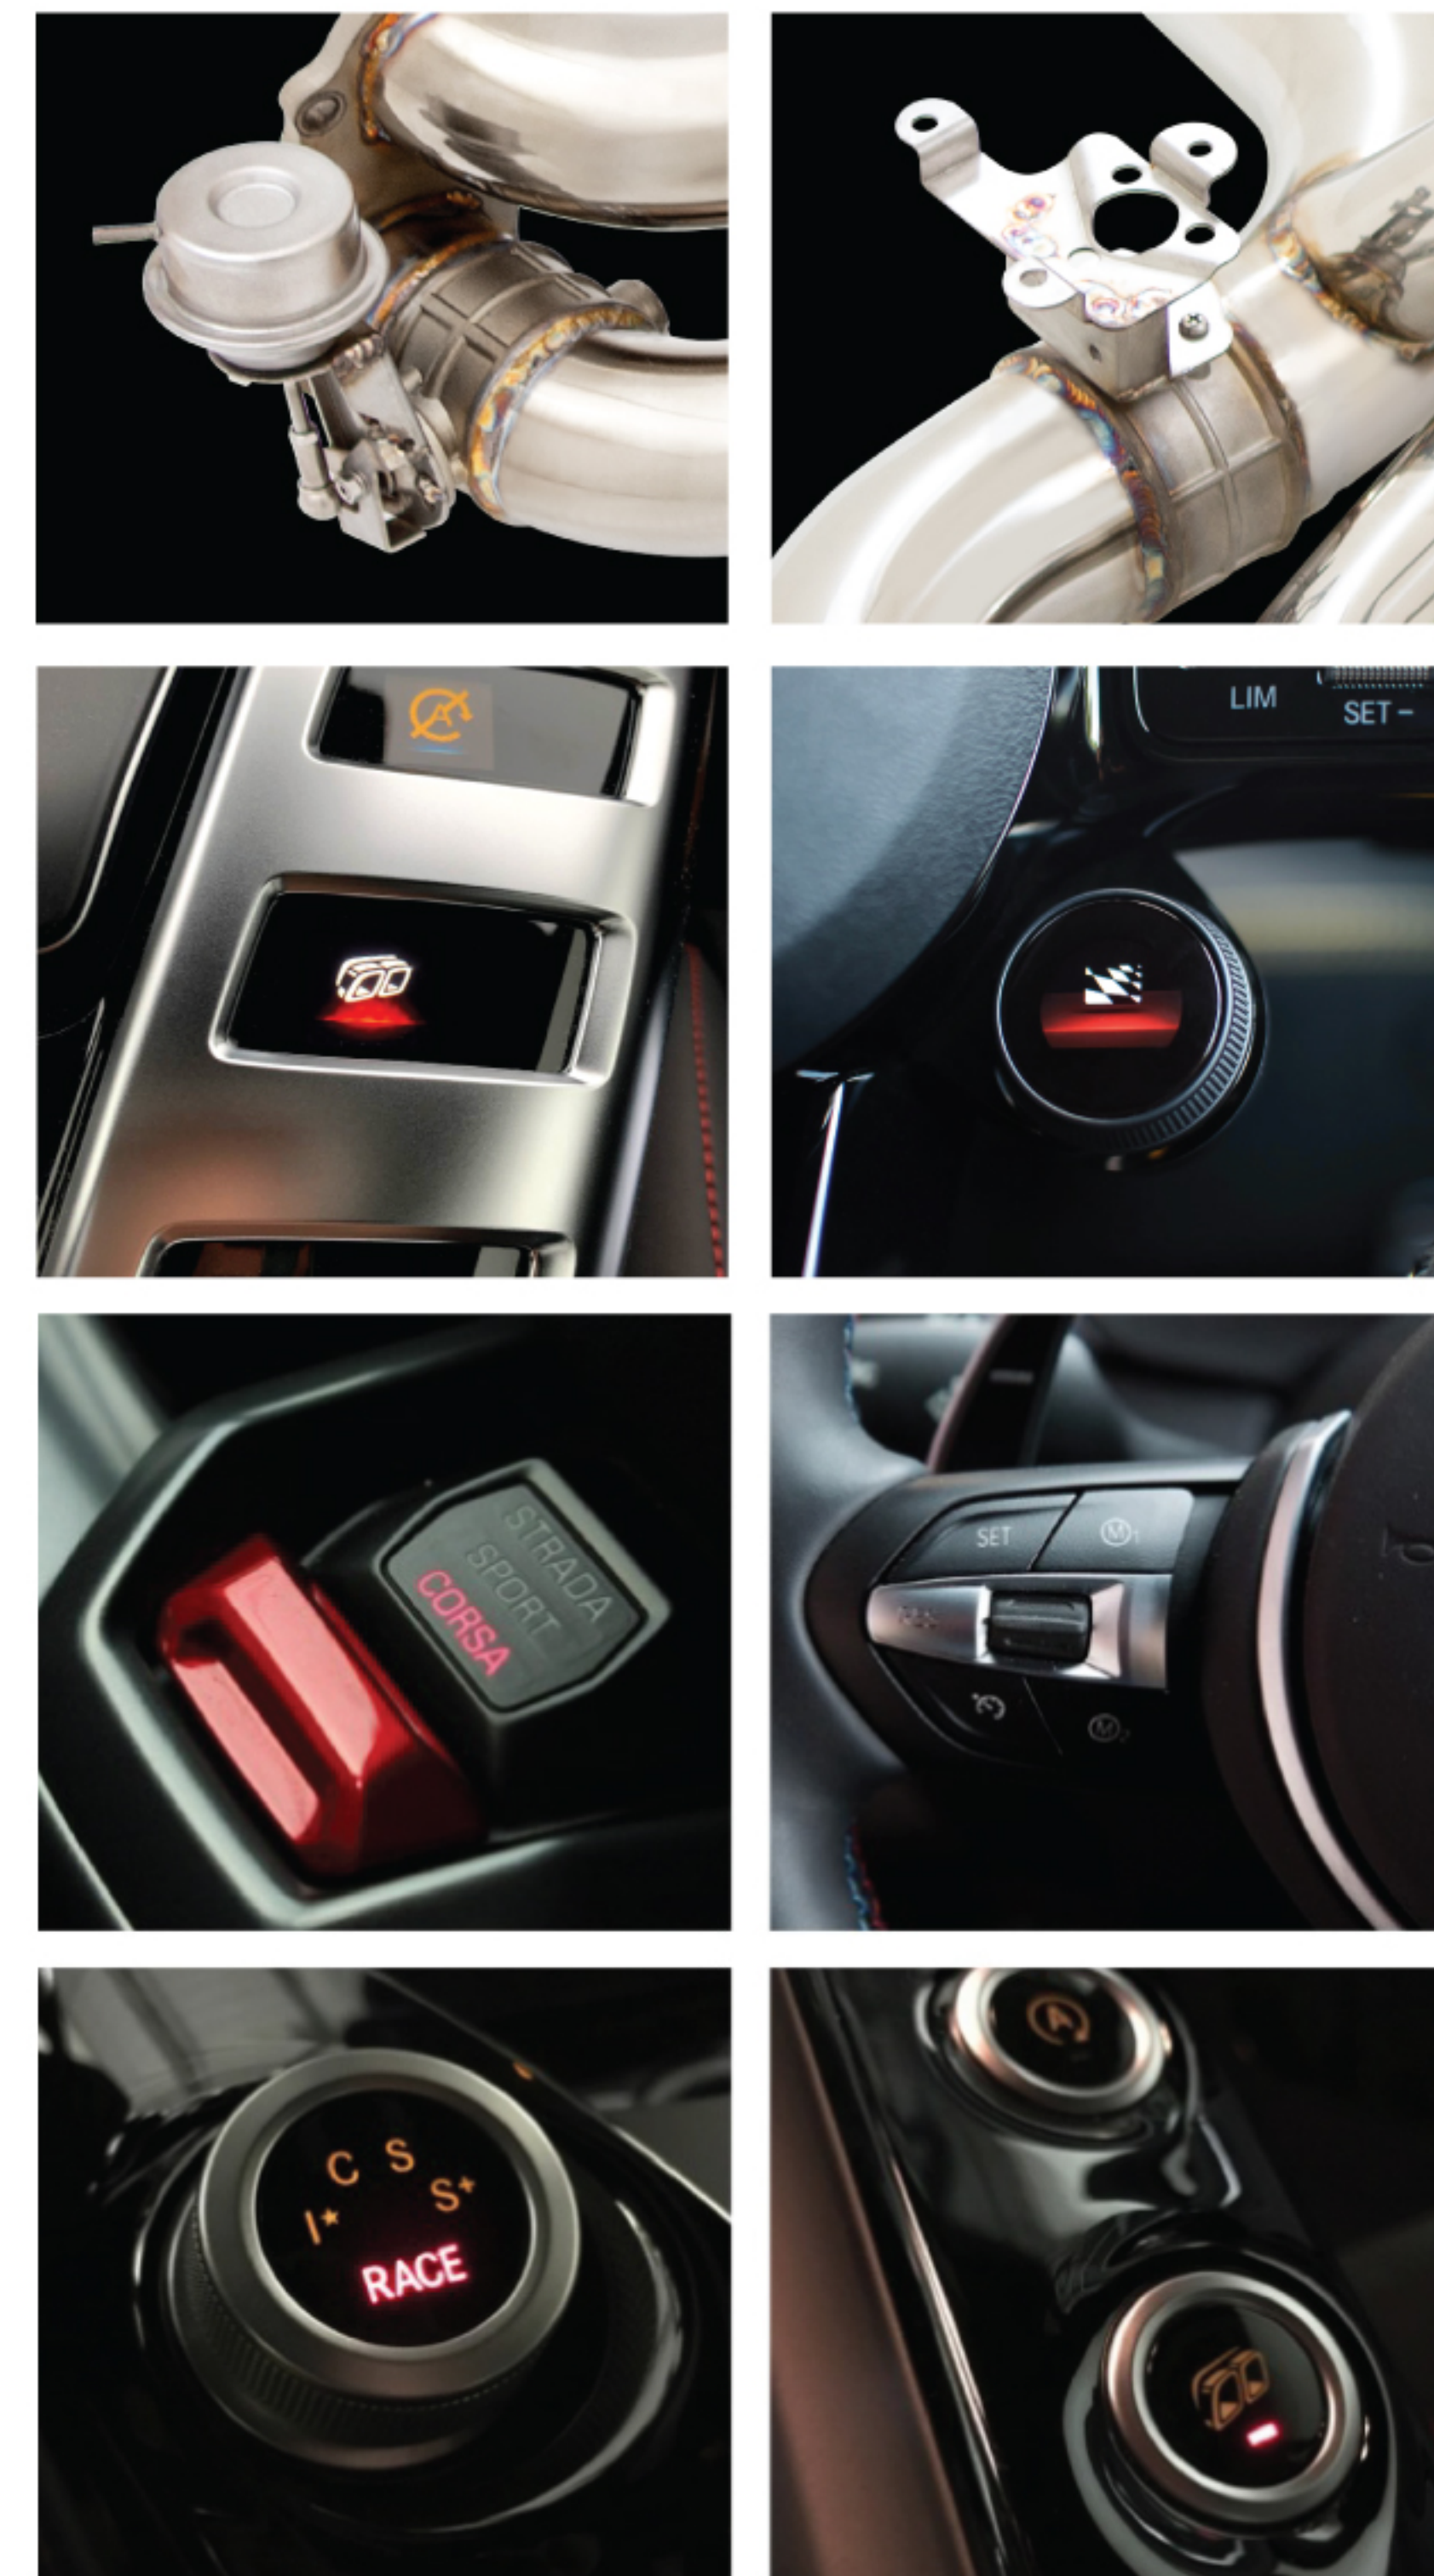

## ADVANCE VALVE TECHNOLOGY

Are you ready to take your car to the next level of sound and performance? Then you need GTHAUS exhaust systems, the leaders in variable chamber technology, which means you can change the tone and volume of your exhaust system.

No matter what kind of car you have, chances are we have an exhaust system that fits your needs. Our products are compatible with the latest valve-controlled systems from OEMs, so you can still use the factory sport exhaust modes and functions. We have been in the business of creating and installing exhaust systems for over 20 years, and we know how to make your car sound amazing. Our exhaust systems are made with premium materials and components, ensuring long-lasting quality and performance.

With GTHAUS exhaust systems, you can have it all: a smooth and quiet ride or a loud and thrilling one, depending on your mood and preference.

Our exhaust systems are designed with specialty components, allowing a plug and play replacement to retain the use of the OEM sport exhaust functions and controllability that is offered by these vehicles.
